DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2-9-04 has been entered.

2. In the parent application, Applicants elected the species of Figures 9-10 in response to an election requirement and all the claims remaining in that application read on such species. However, claim 11 no longer reads on the elected species since it includes only one backsheet discontinuity and the species of Figures 9-10 shows two. Therefore, the claims are again drawn to more than one patentably distinct species of the invention. Therefore, a new election requirement follows.

Election/Restrictions

3. This application contains claims directed to the following patentably distinct species of the claimed invention: one of the species of Figures 9-10 and the species of claim 11; and one of the acquisition layer compositions, e.g. page 18, line 20-page 20, last line; and one of the acquisition/distribution layer compositions, e.g. page 21, line 1-page 22, line 25; and one of the second absorbent core component materials; and one of the third absorbent core component

Art Unit: 3761

materials; and one of the storage/redistribution layer compositions; see, e.g., page 22, line 26-
page 24, line 24 with regard to the latter three.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. For example, a complete election could include the election of the species of Figures 9-10, an acquisition layer of absorbent foam, an acquisition/distribution layer of open celled absorbent polymeric foam, a second absorbent core component of fibrous wet laid web materials,

Art Unit: 3761

a third absorbent core component of fibrous nonwoven material and a storage/distribution layer of collapsible polymeric foam material.

5. A telephone call was made to Mr. Michael Hayden on 4-27-04 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. The applicant is requested to contact the Examiner upon receipt of this election to discuss the possibility of consolidating numerous related applications of which the instant application is the oldest in order to simplify prosecution, e.g. avoid double patenting issues, etc. Also it is noted that the 2-9-04 amendment does not comply with 37 CFR 1.121 as revised 7-30-03, e.g. the status of all the claims in the application was not set forth, e.g. --Claims 1-10(cancelled)--.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karin M. Reichle whose telephone number is (703) 308-2617. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Calvert can be reached on (703) 308-1025. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
